TRAP ENERGY SOLUTIONS

Boiler Room Solutions for the 21st Century

SERVICE-DISABLED VETERAN-OWNED (SDVOSB) · SBA VETCERT CERTIFIED · AMERICAN MADE · EST. 2018

Capabilities Statement

COMPANY OVERVIEW

Trap Energy LLC (dba Trap Energy Solutions) is a **Service-Disabled Veteran-Owned Small Business (SDVOSB)**, certified through the U.S. Small Business Administration's VetCert program. Founded in 2018 and based in Shakopee, Minnesota, the company serves the Upper Midwest, specializing in boiler-room and steam-system solutions for commercial, industrial, institutional, healthcare, and federal facilities — helping owners turn boiler-room energy loss into measurable savings while improving reliability, safety, and regulatory compliance.

The company is led by founder and 100% owner Garrett Trapnell, a U.S. Navy nuclear-power-trained veteran with approximately 25 years of boiler experience, including more than 20 years as a commissioned boiler inspector, a Minnesota-licensed Chief A boiler operator, and U.S. Department of Energy steam-system assessment and steam-trap survey training.

CORE COMPETENCIES

- High-efficiency boiler sales, installation & commissioning
- Steam & hot-water system design and modernization
- Steam-trap surveys & boiler/steam-system energy assessments
- Water treatment for boilers, cooling towers & closed-loop systems
- Preventive maintenance & remote boiler monitoring
- **Steam System CRES Score** — Compliance, Reliability, Energy efficiency & Safety evaluation

DIFFERENTIATORS

- Exclusive **MIURA America** partner (protected territory); factory representative for **RITE Engineering** and **SELLERS Manufacturing**
- Built Minnesota's first **Unoccupied Boiler Plant** — high-pressure steam with no on-site licensed operator, saving the customer an estimated $400K–$600K per year
- Designs and builds **mobile / skid-mounted boiler plants** for temporary and portable heating requirements
- Deep boiler-code and inspection expertise; expanding **R-Stamp** pressure-equipment repair capability
- **Mobile Demonstration Unit (MDU)** for on-site equipment evaluation and MIURA demos

> **Published thought leadership:** "The Boiler Room Disconnect" — feature article, *Chief Engineer*, October 2026.
