

Descaling Services

***Improve the Performance & Longevity
of boilers, water heaters, & other equipment***

Trap's process uses a powerful and non-hazardous descaling solution designed to tackle the toughest mineral deposits. The descaling solution is specifically formulated to address challenges such as iron oxide scale, lime, struvite, rust, and more.

TRAP

ENERGY
SOLUTIONS

Descaling is effective and safe. In addition to tackling the toughest mineral deposits, the solution contains inhibitors which protect the metal surfaces from corroding. Its non-hazardous, ensuring easy handling and application while maintaining a safe working environment.

- Increase Efficiency**
- Save Energy**
- Reduce Maintenance Costs**
- Extend Equipment Life**

Equipment Performance is improved when scales and deposits are removed. Descaling increases the efficiency and performance of boilers, water heaters, and other equipment. This translates into energy savings, reduced maintenance costs, and extended equipment life.

Trap Energy Solutions provides sales of high-quality and sustainable commercial-industrial steam-energy solutions, and ongoing maintenance solutions to keep the equipment performing at an optimal level. Our process starts with identifying energy saving opportunities in commercial industrial process steam plants. Then we recommend sensible energy conservation measures (ECM) that deliver sustainable and unique energy saving solutions that have rapid ROI.
